2. Citations and explanations

Document 1: JP 8-41416 A (Central Glass Co., Ltd.) 13 February 1996

Document 2: JP 7-113057 A (Dainippon Ink and Chemicals, Inc.) 2 May 1995

Document 3: JP 2-245067 A (Nippon Paint Co., Ltd.) 28 September 1990

The above documents were cited in the international search report.

Based on the description in document 1, the inventions set forth as Claims 1, 3, 6, 7 and 10 do not appear to be novel and do not appear to involve an inventive step. Document 1 describes a fluororesin coating composition that contains polymerizable compounds having glycerine monoallyl ether and carboxyl groups as repeating units (Claims 1 and 3; Par. No. 0009; Examples 1-7). That composition is indistinguishable from the stainproofing agent of this invention.

Based on the description in document 2, the inventions set forth as Claims 2-7 and 10 do not appear to be novel and do not appear to involve an inventive step. Document 2 describes adding an acrylic resin composed of N-methylol (meth)acrylamide as an essential component to a high molecular polyester resin and states that it has excellent stain resistance (Claims 1, 2, 6 and 7; Par. Nos. 0062 to 0072).

Based on the description in document 3, the inventions set forth as Claims 2-10 do not appear to be novel and do not appear to involve an inventive step. Document 3 describes a water repellant coating composition containing acrylic resin in a fluoroolefin-alkyl vinyl ether resin, and it describes N-methylol acrylamide as a monomer in that acrylic resin (Claim 1; page 4, upper right column, line 11).
